

# Mixing colours

**Goal:** To make different colours by mixing

**Materials:** Paper plate, paint: blue, yellow, red and white.

**Method:** 1. Draw five circles on the paper plate.  
2. Paint one of the circles blue, while it is still wet mix red in with it.  
3. With all the other colours do the same thing. The other colours to mix are... blue and red, blue and yellow, yellow and red, red and white and red and green.

**Result:** By mixing blue and red you made purple. By mixing blue and yellow you made green. By mixing red and yellow you made orange. By mixing red and white you made pink. By mixing green and red you made brown.
