

Teeth

Everyone needs teeth.

They are used for eating- Front for biting, back for chewing. Some teeth are very sensitive so cold things hurt.

Teeth are surrounded by gum. Healthy gum is pink. Some teeth hurt or are bad so the dentist pulls them out. Teeth have to be brushed twice a day in the morning and before bed time.

Teeth have lots of layers enamel, dentine, pulp, crown , gum, bone , nerves , blood vessels and root. Enamel is a really tough part of teeth but too many fizzy drinks and sweets can crack it.

There are two sets teeth milk teeth and permanent teeth. All babies are born with teeth but they are hidden in the gum. You have? 24 milk teeth and 32 permanent teeth.
