

Teeth

Every person is born with teeth.

Teeth are used for biting and chewing. There are two different types of teeth. Back teeth are used for chewing and front teeth are used for biting. Milk teeth are the first teeth there are 24 milk teeth. After that people get permanent teeth there are 32 permanent teeth. Teeth are very useful and very interesting. Don't open bottles with teeth because it ruins teeth. Spend enough time brushing the teeth.

Don't have too much sugar with food and drinks because it crack's the enamel on teeth
