

# Should Christmas tree lights be on all the time?

Dear reader.....

Christmas tree lights are beautiful and bright for others to see for themselves so they could have an idea for what they want for Christmas time and to light up the house which is nice.

No Christmas tree lights should not be left all day because it can cause severe fires in shops and homes. It is also wasting so much electricity and the bills will rise and keep rising and rising and more worse but we still think it should be on a timer set for so many minutes. So we say yes to leaving them on

for so many minutes in the evening and night.

That is why we think Christmas trees deserve Christmas tree lights.
