

Should you get real or fake Christmas trees ?

Most people like decorating Christmas trees in shops and houses. But we think people should only get fake trees.

In real trees there could be poisonous berries. We think everyone should get fake trees just in case they are poisonous berries. Clearly people might not be able to fit the tree in the door. But obviously people do not need to do that with a fake tree. People don't need to put it in door they can just make it.

We think everyone should get a fake tree so you don't need to go through all the trouble.
