

**Should children be allowed to touch the Christmas tree?**

**Christmas trees are trees that people pick to use for Christmas. We know that children like decorating trees. We think small children should not be allowed to touch the Christmas tree.**

**The tree could get hot because there's lights on it. We know that children like decorating the Christmas tree but under threes should not be allowed to touch the Christmas tree because of the lights.**

The Christmas trees needles could stick in them. It could fall on them or squash them. The children could knock the Christmas tree. The tree could break if children keep on at it.

That's why we think you should not let your kids near the Christmas tree. We hope you agree with us?
