

Should Christmas trees be real or fake?

Christmas trees are nice to have in houses at Christmas. Christmas trees are a good decoration. We think that fake Christmas trees are better than the real trees.

Real Christmas trees are messy and very painful when stepped on its spines. Real Christmas trees are much harder to bring through the door than fake Christmas trees because fake Christmas trees can come apart.

Chopping down real trees is bad for the environment because it is cutting down our oxygen supply.

Clearly we think that fake Christmas trees are best. So they don't hurt people, they're easy to get through the door and better for the environment. By Alex O Neill and PATRICK O LEARY!!!!
