

My exciting summer!

I had an exciting summer because I went to Australia.

I went to the airport at 10 o'clock at night. My family and I went to Dublin airport in the car. It took two and a half hours to get there. We had to go on two aeroplanes because Australia is so far away. When we landed at Sydney airport Jason my brother, was waiting there with a grin on his face.

Later that day we arrived at his apartment it was very fancy. Two days after that he brought us to a wildlife park called Feather Dale Wildlife Park. There were lots of animals there like kangaroos, koalas, and a bear sort of a thing called a wombat. There was a lot more sorts of animals. My favourite animal was the kangaroo and koalas. This is what the wombat looks like.

The day after that he brought us to Sydney museum. There was lots of dinosaur bones there. There was also a stuffed koala and stuffed birds. It was very interesting.

The day after that he brought us to see the Blue Mountains. They are called the Blue Mountains because they looked blue in the distance.

And that is why it was an exciting summer.
